

Is your business drowning in paperwork?

“360Retrieve fundamentally changed the way we operate our business for the better”

The Power to convert your physical and electronic text documents into business intelligence

360Retrieve is a web based enterprise solution that automatically indexes information held in scanned images and electronic office files. Its unique pattern matching search technology enables you to quickly and easily query text within documents.

360Retrieve will deliver exact and near matches, overcoming both typographical and OCR misread errors, delivering the results to your search parameters within seconds.

360Retrieve

Disruptive Without Disruption

360Retrieve Incorporates

- » Automatic indexing of scanned images and electronic office files.
- » Indexing at a rate of in excess of 6000 A4 pages per minute.
- » Pattern/fuzzy search technology overcoming OCR errors and inaccurate search queries.
- » Concept Searching – determine your own related terms e.g. search UK and find England, Wales, Scotland, GB etc..
- » Boolean searching – include Boolean operators such as AND, OR, NOT, NEAR etc.. Within your search parameters.
- » The functionality to apply and match intelligence and bespoke Watch-files.
- » The power to ad hoc search hundreds of thousands of documents and see the results in seconds.
- » Automatic ranking of results within 360Retrieve presented within an 'intelligent' hit list.
- » Results ranked according to their relevance to the search parameters.
- » Results and hit words are displayed and highlighted within a 'snippet' of the document which the search parameters identified.
- » The results can also be viewed in an electronic scanned image of the document and again the search parameters and results are highlighted.
- » Exact and near matches are distinguished, colour coded and highlighted in both the result snippet and scanned document image.

Scanned documents, PDF, Office documents, text files and image files all indexed, stored in one place and accessed on the web

The Benefits of 360Retrieve

- » The power to turn physical and electronic text documents into searchable data within seconds.
- » Turning archived files and filed documents into accessible and searchable business information and intelligence.
- » Fast, quick and easy document scanning and ingestion.
- » No more lost or misfiled information.
- » No more expensive lengthy paper trails and searches.
- » Simple to use interface, search tools and parameters
- » Savings on physical storage and office costs.
- » Reduction in printing and associated costs.
- » User and management information.
- » Full training and support.

Store, share and manage your company's data

“over 400 hrs per employee per annum is lost to document filing and retrieval”
PWC independent research
